

# AA97 Series Custom Configuration Chart

**Specify front panel legends, internal functions and options including illuminated knobs.**

## Installation Information:

Airframe Type: .....

Control Location(s): .....

## Functions:

Similar to existing control #: .....  
(Provide number)

6th Transceiver option?: .....  
(Precludes handmic function, non-std.)

Install 3rd boom mic function?: .....  
(Precludes handmic function, non-std.)

Install rear hand mic function?: .....  
(Emergency mic port, also used for rear PAX TX expansion)

Install rear hand mic switch?: .....  
(Can only go in designated position)

PA sidetone?: .....

PA keyline?: .....  
(Creates non-std interconnect)

Install tape inputs?: .....  
(Switched, direct or none)

Low impedance output or input: .....  
(Single user control only, precludes alerting)

RX muting during TX?: .....  
(If unmuted: fixed or adj./Called RX monitoring)

## Internal Alerting & Direct Inputs

Install internal alert generators?: .....

Internal alert generators (1, 2 or 3): .....

Direct input, Type A?: .....  
(Present in Normal Mode, adj. via amplifier)

Direct input, Type B?: .....  
(Present in All Modes, direct to pilot's hdst)

Direct input, Type E?: .....  
(Present in All Modes, adj. via amplifier)

## ICS Functions

VOX ICS Mode?: .....  
(Alternate is Live/Keyed ICS)

ICS mute during TX?: .....  
(If un-muted: fixed or adj./Called ICS Monitor)

ICS CALL LED?: .....  
(Amber, momentary)
