Dear Valued NAT Seattle Customer:

Cobham Avionics has announced the integration of NAT Seattle, Inc. (dba Cobham Avionics, Bothell) into our Strategic Business Unit in Prescott, Arizona. This action will result in the transition of all activities currently carried out in Bothell to either our Prescott or Kelowna facilities. This change is part of a corporate strategy to strengthen our infrastructure and business processes to more effectively serve our customers.

First, and foremost, we want to reassure you that your account will continue to be serviced professionally, by knowledgeable and capable staff, to make sure your needs are addressed.

Our transition activities have just begun with the announcement on July 29, 2009 of the closure of the Bothell facility. Over the next 5 - 6 months all activities associated with products currently manufactured at Bothell will be transferred to Cobham Avionics in Prescott. *It is important that you continue all business transactions with NAT Seattle Inc. until you receive an official notification/request from us to change any of our accounts within your system(s).*

As our transition continues to progress, you will see the manufacture of selected Bothell products moved in a phased approach from Bothell to Prescott. As manufacturing responsibility transitions to Prescott, repair responsibility for the affected products will also transition at the same time. Our schedule shows the transition of activities will be completed by the end of 2009.

To minimize the impact to you, until further notice your sales and repair contacts will remain the same and order processing will continue as before through the Bothell site, with no need for you to change anything in your system when ordering new products.

Cobham Avionics in Prescott is an authorized FAA Manufacturing and Repair Depot holding FAR 145 and EASA repair station approvals. If Cobham Avionics in Prescott is not already on your Approved Vendor list, please contact Jim Makela, Director of Quality Assurance at (928) 708-1550 or Jay Jensen, Director of Customer Service and Repair at (928) 756-1615 for information.

Engineering functions will be transferred to Cobham Avionics Prescott and/or Cobham Avionics Kelowna (Canada). Our intent is to provide a smooth transition so that continuing product development is affected as little as possible. We are still committed to the future of the Cobham Avionics Bothell product lines.

Thank you for your patience and understanding during this time of change. We appreciate your business and will continue to provide excellent service during this transition and following. As always, if you have any concerns or questions please let us know.

Sincerely,

A handwritten signature in black ink, appearing to read 'Mitch Stinson', with a horizontal line underneath.
